He would not asked a man to change his political belief without being able to give him a good reason for asking him for the change. Figures don't lie and that is why the republican party doesn't give any. He referred to a republican speaker recently claiming nat since Harrison took the Icins of overhment 147 137 agricultural patents ad been issued. He did not believe this cause a republican had said it. He invest-rated and found that only 27,000 had been saied. During the week ending Aug. 10, 889, 1,400 patents were issued and this was nade the subject of a circular-probably for stigated this matter by writing to a friend a New England manufacturing town, the told him that nine-tenths of the labor f New England factories are foreigners at the present time. He said reports were being spread to the effect that the democratic party was demoralized and disheartened. He assured his audience this was a ruse and that never was the party so well organized and so sure of victory. [Applause.] On the other hand defeat stares the republicans in the face and already, particulary in Silver Bow county where they are willing to trade off the entire ticket for the election of Carter and the legislative ticket. trade off the entire ticket for the election of Carter and the legislative ticket. Nothing is said in the circular they have issued about Power and the rest of the ticket. Continue to show your gallant front, the speaker said, and democracy will have a sweeping triumph on October I. [Long continued applause.]

S. K. Davis, candidate for public administrator, said the coming election was of vital importance. Interest in the result is not only confined to Montana but stretches all over the country and to the center of the national government. The republican party is the party of appropriation and in their declaration of principles at Anaconda appropristed the declaration of independence. He read extracts from the platform and showed how ridiculous some of party is the party of appropriation and in their declaration of principles at Anaconda appropriated the declaration of indepen-dence. He read extracts from the plat-form and showed how ridiculous some of the statements were. He said he could not see what claims Carter had to being a statesmen. His only exemplification of that being that he spells God with a little g and Carter with a bur C.

with one exception there never has been a national election where the democratic candidate didn't receive a majority of the popular vote. Republicans say they are the party of progress. He disagreed with them. There are three class of people in the republican party; one wants money, the other wants office and the other wants work. The office holder promises to give work if he is elected. There was a time when people voted for the man for the place. The condition has changed now. We have a fight on hand. The second war is a battle for money by the republican to the melody. It was claimed that the republican ticket would be elected from top to bottom, and so sure were some of the listeners that the statement was a fact that they went out and tried to secure bets of \$500 to \$1, but they were snapped upso eagerly that their funds soon run out. The first ward is so solidly democratic that republican meetings don't count.

The mistake of the republican party is advocating building up the capitalized industries and not the non-capitalized industries. By this means they promise you work, and that is all. Judge Bach adds that in all of his counties there have been at most times two deputies to have a deputy present at all times otherwise; that in many cases one of these deputies has been a republican, for instance, the followout with me, and when we got a few miles out of town and were just turning around a bluff, a couple of road agents pointed shotguns in our faces and told us to dig up.
